

LAWTON HALL ESTATE RISK ASSESSMENT

Date of revised risk assessment July 2020

(Date for review: July 2021)

LAWTON HALL ESTATE

The Management of Health and Safety at Work Regulations 1999, The Regulatory Reform (Fire Safety) Order 2005, and other health and safety regulation, requires the company to:

- Assess the key risks in the communal areas and parts of the estate and help prevent accidents and ill health by considering what hazards exist and how they can be managed.
- Make all residents, visitors and contractors aware of the risks involved.
- Develop safe systems and methods of work and ways to manage these risks.
- Ensure volunteers are trained in safe ways of working, and contract managers check that contractors have appropriate health and safety policies and procedures in place to carry out work on the estate.
- Advise all residents that they are primarily responsible for keeping themselves, their families, and their visitors safe in the estate's communal areas and parts, that they must comply with the health and safety requirements of their leases, and that they should take health and safety seriously. Owners that have let out their properties are responsible for ensuring that their tenants have a copy of the Health and Safety Policy and Risk Assessment.

What are the hazards?	Who might be harmed and how?	What are you already doing?	Do you need to do anything else to control this risk?	Action by who?	Action by when?	✓
